ILLUMINATION

The RMIT BA Photography Students 2006 Graduate Exhibition, "Illumination", will be held at Brightspace Contemporary Arts Venue from November 28th to December 3rd.

Graduates of the program have dominated the Australian professional imaging market and enjoyed success and recognition internationally. The culmination of three years of intense visual study and imaging techniques, this exhibition showcases the latest efforts of this talented ensemble.

In what is often a highly competitive industry, a group showing of burgeoning creative minds is exciting to witness. "Illumination" offers light and shade, humour & pathos, hyper reality and gritty realism.

The combined body of work includes images from a broad spectrum of genres; from high-end studio based advertising photography to fine art, photojournalism and architecture. The uniting factor is a dedication to detail and an inherent understanding of visual perfection.

Exhibited in the modern and contemporary environment of Brightspace gallery in St Kilda, this collection of images from emerging professional photographers deserves a taste-test. "Illumination" serves up a smorgasbord of new talent.

A sneak preview of the images represented can be found at the exhibiton website:
